**ONE DAY DETOUR REQUIRED FOR DOVER BRIDGE WORK**  
**CATARACT AVENUE OVER THE SPAULDING TURNPIKE**

The New Hampshire Department of Transportation announces concrete pouring work on the Cataract Avenue Bridge reconstruction project over the Spaulding Turnpike will require traffic to be detoured on Thursday, November 14, 2002.

Motorists traveling on Cataract Avenue on November 14 between 7:00 am and 4:00 pm will be detoured via Bellamy Road, NH Route 155, Silver Street, Rundlett Drive and then back to Cataract Avenue. The detour will be marked in reverse for traffic traveling in the opposite direction.

Uniformed officers and detour signs will be used to guide traffic around the closure at opposite ends of Cataract Avenue. Local residents will be able to gain access to their properties.

In the event of adverse weather, this detour will take place on Friday, November 15.

Prior to and following the one-day detour, the Cataract Avenue Bridge will be one-way alternating traffic with a traffic signal.

Evroks Construction of Winnisquam, New Hampshire is the contractor for the \$807,000 bridge reconstruction project, which has a scheduled completion date of September 2003.
